- 5TH LINE CONTROL BAR SUPPORTS THE B-SAFE SYSTEM
- HIGH COMFORT DUE TO EVA GRIP AND SOFT BAR ENDS
- SIMPLE MAINTENANCE WITH EXCHANGEABLE WEARING PARTS
- BEST VALUE FOR MONEY
- SHORT SAFETY LEASH

FOUNDATION FOR EVERY SMART SHOPPER

FLYSURFER has created a bar option for the smart shopper, looking to maximise value at a lower pricepoint. The CONNECT bar is the heart of the new progression / freeride line-up, which aims to be accessible for all, from beginners all the way up to adventurers and every service provider who wants to establish himself in kite sports. FLYSURFER offers great value to its customers and the CONNECT bar underlines this as the first product line of our new control bar systems.

MARKETING

TOURING

At 0.84 kg complete the CONNECT Bar is the lightest FLYSURFER control system.

FREERIDE

Extremely smooth steering will keep you inspired every session.

PROGRESSION

Durability is an important part of everyday use, FLYSURFER focus on functionality and low wear of components, the CONNECT BAR is unbeaten in price / performance and a must for every kite school.

SAFETY

Soft bar ends prevent injury and damage to equipment, and our QR 3.0 is approved by the French norm.

FAQ FOR CONNECT BAR SYSTEM

Is the CONNECT Bar working with other Flysurfer products?

No; the CONNECT Bar is only working with the PEAK4 product line so far.

Is the CONNECT Bar also available as 4-line a setup?

No, the CONNECT Bar will only be available as a 5-line setup.

Is FLYSURFER working on new products which are supported by the CONNECT Bar?

Yes in short future there will be a new version of the VIRON, which is working perfectly with the CONNECT Bar.

Does the B-Safe System replace the Reef-Line Safety System?

Yes all our 5-line supported safety systems will be called B-Safe in the future. We want you, to be safe out there.

Will there be a 5-line setup upgrade kit for the INFINITY Control Bar?

No; there will be no upgrade kit for the INFINITY Control Bar.

Can I use the B-Safe System with my INFINITY Bar?

No, you can not use the B-Safe System and we do not recommend a work around, for safety reasons.

Which control bar is compatible with the B-Safe System?

The B-Safe system can be activated with any 5th line safety control bar which has equal length flying lines. To do this, the enclosed set of PEAK4 B-Safe top lines need to be connected to the kite and the 5th line.

To get the most out of my new PEAK4, I have to buy a CONNECT Bar?!

The PEAK4 is fully functional with any Front Line Safety system (FLS). You are safe and have all the benefits of the new wing. On top the CONNCET Bar weight is only 0,84 kg including flying lines and therefore it fits much better to the PEAK4 product line. But to answer your question shortly, yes to get the most out of your PEAK4, you want to have the CONNECT Bar.

Is it possible to attach the CONNECT Bar to PEAK3 or SOUL kite?

No you can not use the bar. Technically, the B-Safe system does not work with the product lines PEAK1/2/3, SONIC, SPEED, VIRON and SOUL.
